

Data Management ^[1]

The Navigate BioPharma Clinical Data Management team has a singular goal—to provide clean and accurate data on time to meet our customers' expectations. Our data management experts will work with you to provide the results you need in the format that you want through personalized solutions—from customized reports to data files delivered through secure FTP connection, your custom data portal or direct EDC entry.

Our Three-Point Promise to You:

- **Accuracy:** All manually-entered data is 100% verified for integrity and quality control.
- **Speed:** Our advanced data management team can build your study database in as little as two weeks. We have an integrated technology infrastructure designed to process and analyze large data sets quickly and securely.
- **Extraordinary Service:** Our experienced managers foster efficiencies and work closely with your data management team to your complete satisfaction.

Navigate BioPharma data management will configure data specifications per our client's exact requirements. We can provide test result reports to clinical study sites to meet your needs via encrypted PDF format. We have broad experience supporting the discovery, development and delivery of biomarkers and providing high-quality data via customized solutions for Phase I studies all the way through Phase III registration and companion diagnostic applications.
